OCTOBER 2 2025

12H30 - 13H30 – VIRTUAL FORMAT (WEBEX)

Intent to stay and career trajectories of healthcare professionals in Switzerland

As a part of the SCOHPICA (Swiss COhort of Health Professionals and Informal CAregivers) cohort symposium series, we are pleased to invite you to the conference presented by

DR JONATHAN JUBIN

Research Fellow at La Source School of Nursing, HES-SO University of Applied Sciences and Arts Western Switzerland

DR LÉONARD ROTH

Statistician, Unisanté

Two main focuses of the SCOHPICA project are the intent to stay in the profession and the career trajectories of healthcare professionals. In this talk, we will present recent developments in the study of these issues. First, we propose a comprehensive model that explains how a range of factors influence the intent to stay in the profession for nursing staff, and how it can be extended to other care professions. Second, we explore data on employment histories collected within the SCOHPICA project by revealing a typology of career trajectories among healthcare professionals in Switzerland, and characterizing the types thus identified. These insights are critical to sustaining a well-staffed and satisfied health workforce. The corresponding analyses are funded by the Swiss National Science Foundation.

Language: English
Recommended by the Swiss Society of Specialists in Prevention and Public Health (SPHD) for recognition of continuing education.
